

Client Deploying

Steps:

- 1- Download linuxdeployqt-continuous-x96_64.AppImage
- 2- Download appimagetool-x86_64.AppImage
- 3- execute the linuxdeployqt-continuous-x96_64.AppImage on client executable

- 4- Make a desktop file

- 5- Execute appimagetool-x86_64.AppImage on the build directory.

```
essam@essam-VirtualBox: ~/Downloads
essam@essam-VirtualBox:~/Downloads$ ./appimagetool-x86_64.AppImage ./Client_Bank_Build/
```

- 6- Here we go a desktop application has been created you can just double click on it and boom.
